

# VISUALIZE 2030

## FIRST SDGS DATA CAMP IN THE ARAB REGION

#VISUALIZE2030

### About Visualize 2030

**Visualize 2030** is a data visualization challenge that calls upon youth in the Arab region to use official statistics with the aim of visualizing a data-driven stories that address development challenges and explore opportunities to advance the Arab region within the framework of the 2030 Agenda.

### Who can participate?

Visualize 2030 targets youth aged 20 to 30 years from Arab countries, among which are young students, researchers, journalists, graphic designers, data visualization developers and active youth interested in advancing sustainable development in the Arab region.

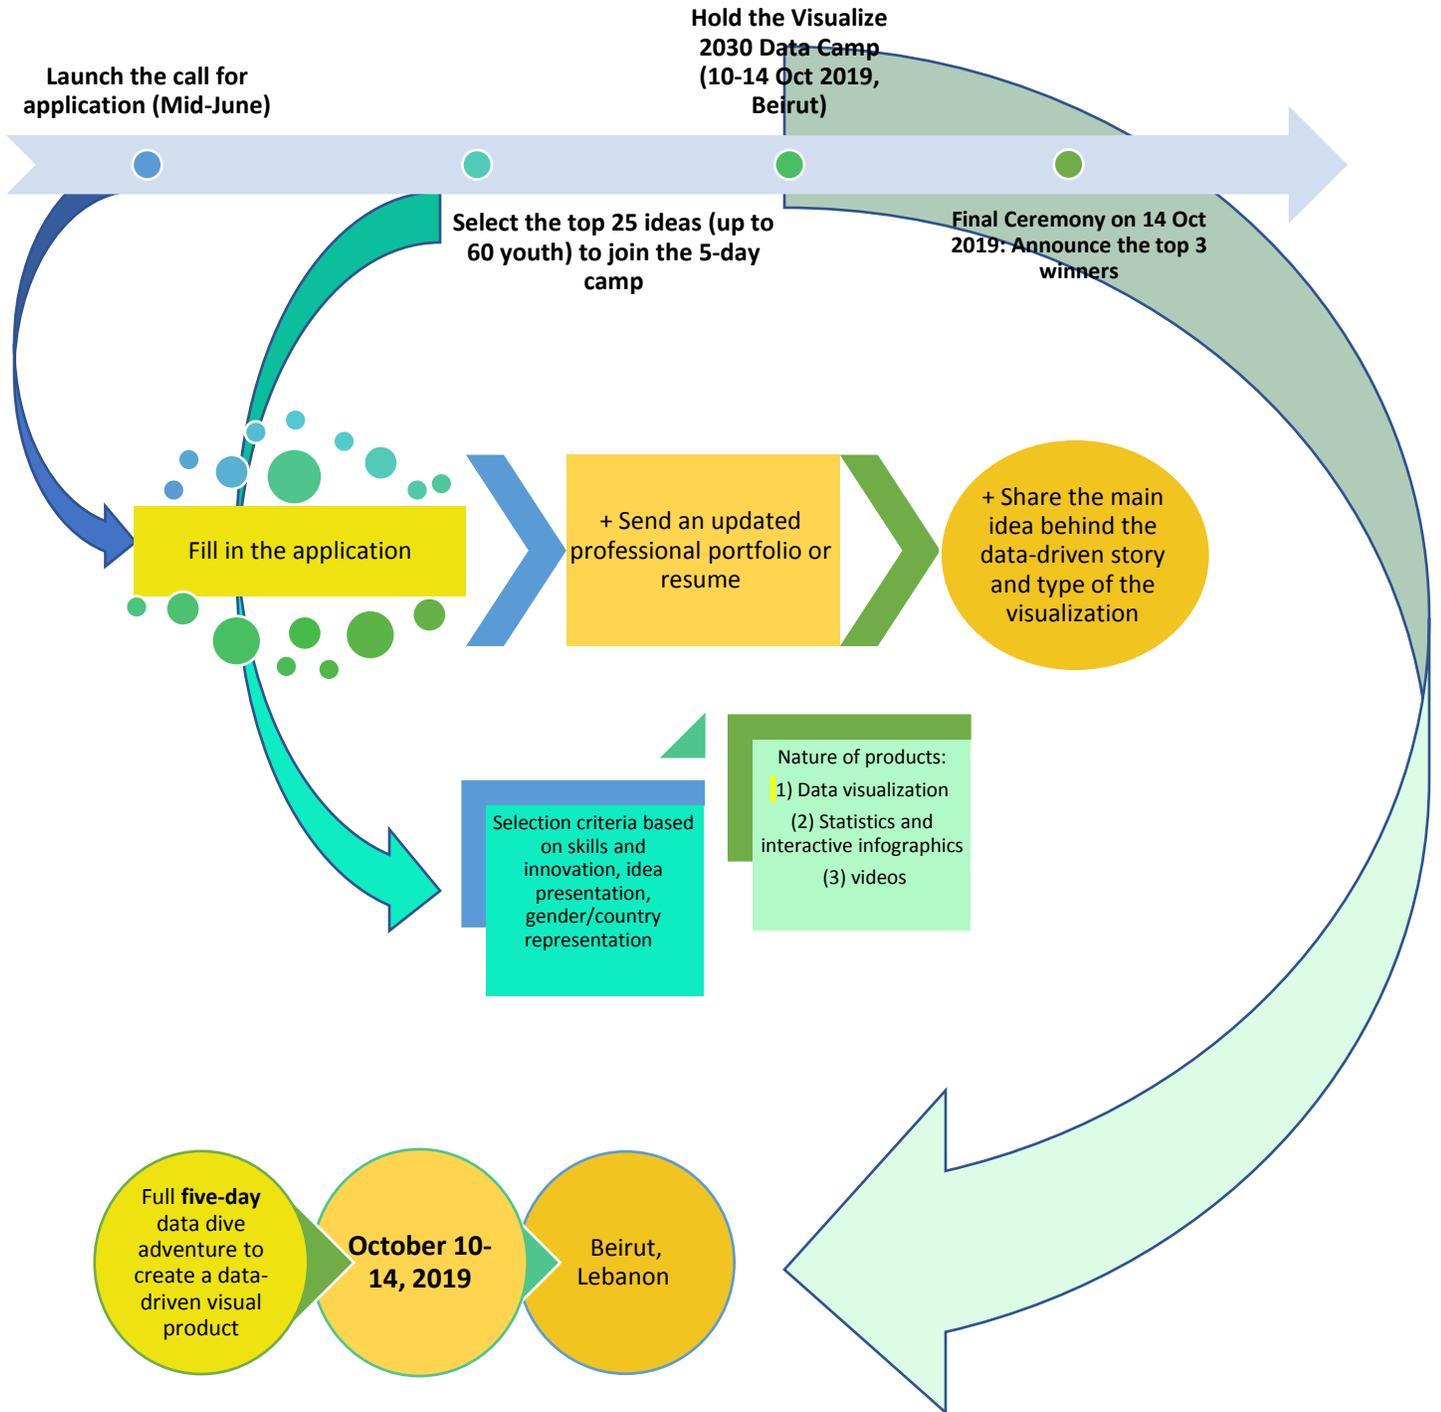

### Objectives

- Encourage youth's meaningful and impactful contribution to public debates on country's and the region's priorities and opportunities within the SDGs
  - Enhance data access, use and communication in an innovative manner
- Advocate for the adoption of open data policies by all data producers, including governments.
- Create a space for multi-disciplinary teams to engage in an enriching exchange of knowledge and capacities (creative development practitioners, data scientists, graphic designers, etc.)

### 2019 Visualize 2030 Theme

Inequalities between or within Arab countries. Their impact on those left behind and the level of sustainable development in general

Visualize 2030 Phases
